## SUMMARY

---

MERN Stack Developer with a BCA degree and currently pursuing an MCA. Completed a 6-month MERN stack Internship, gaining hands-on experience in building scalable web applications. Proficient in React.js, Node.js, Express.js, and MongoDB, with strong problem-solving and teamwork skills. Passionate about developing efficient web solutions and staying updated with the latest technologies. Currently based in Pune and open to new opportunities.

## TECHNICAL SKILLS

---

<b>Programming:</b>	• JavaScript • C
<b>Database:</b>	• MongoDB • MySQL
<b>Tools:</b>	• Rest APIs • Git • GitHub • Postman
<b>Frameworks/Lib:</b>	• React.js • Node.js • Express JS
<b>CSS/ Frameworks</b>	• Bootstrap • Tailwind CSS • CSS3

## INTERNSHIP EXPERIENCE

---

### Opash Software

Surat, India  
Jan 2024 - July 2024

- As an intern specializing in MERN (MongoDB, Express.js, React.js, Node.js) development, I was entrusted with designing and crafting the user interface for a student dashboard, as well as contributing to various other projects. These projects were built using a combination of React.js, Next.js, Node.js, MongoDB, technologies.
- I demonstrated proficiency in creating web pages that maintained compatibility across different browsers and were responsive in design. Techniques such as Tailwind CSS, and CSS3 were employed to achieve these outcomes.

## ACADEMIC PROJECTS

---

### E-commerce Website.

Jan 2022 – Feb 2022

- Built a responsive e-commerce site for the fashion industry using React, Redux.
- Created cross-browser compatible and Responsive web pages using CSS3.
- Integrated backend API with the site to enable filtering, sorting, cart, checkout, and Gained React, Redux, and API integration expertise through project challenges.

### To-Do List.

Dec 2021 – Dec 2021

- Developed a web application using Express, Mongoose, and EJS that allows users to create and manage a to-do list.
- It had multiple routers to access specific lists, like Work To-Do and Home To-do.
- Integrated MongoDB using Mongoose as the database to store and manage the to-do items.

### Portfolio Website

- This is a personal portfolio website built using MERN (MongoDB, Express, React, Node.js) project that focuses on managing client details and associated project information.
- The backend is developed using Node.js, Express, MongoDB, while the frontend is built with React.js, JavaScript, and utilizes both Tailwind CSS and Bootstrap for styling.

Deployed link: - <https://kirantirmales.vercel.app>  
Git link: - <https://github.com/kirantirmale/mern-app>

### Movie and Series

- This is a web application built with React.js that fetches data from a JSON file using Redux. The app provides a user interface for displaying a collection of series and movies. It includes various features and functionalities to enhance the user experience.
- Data Filtering and Sorting: The app filters the entries based on the release year attribute, only displaying those with a value greater than or equal to 2010. The filtered entries are sorted in ascending alphanumeric order based on the title attribute.
